

## **CA4120 Print Portfolio Presentation**

Instructor: Krishna M. Sadasivam

Now that you have a functioning navigation bar and template pages, the next step is to populate your site with content.

Building upon your portfolio website so far:

1. integrate an external CSS page that will contain all your CSS markup for your website.
2. Build your portfolio gallery and integrate it into at least one page on your website. Your site should have a good cross section of images that show off your versatility as an artist.
3. Organize your images and thumbnail images into separate folders. You may use Lightbox or another method to implement your gallery, but pay particular attention to note that your gallery must aesthetically fit in with the rest of your website.
4. Populate your site with content (text / graphics). Don't forget to add a page for your resume.

The grading rubric is on the next page.
